

Reducing Emissions after treatment

Written by Dan

Thursday, 08 March 2012 10:36 - Last Updated Thursday, 08 March 2012 10:49

MoreMPG™ reduced Hydro Carbons 96%, CO 98% and NOx 80% after treatment. ✓

This test was run by an Ontario Drive Clean Service Centre, the car failed back in 2010 and was instructed to change the CO sensor at a price tag of around \$300, the owner parked the car instead and on March 7 2012 he had contacted MoreMPG and asked if applying the MoreMPG would make his car pass the emissions test, the response was that we cannot guarantee that it will pass as we do not know the condition of the car and could have some mechanical issues that we are not aware of and so the only suggestion we could tell him is to try it and find out. MoreMPG was applied and then driven on the highway for about 45 minutes to have the emissions test done again, it PASSED with amazing results.
